

# Tetromino Tussle

Welcome to Tetromino Tussle! This is a challenging, 2-player falling block game that is fun for all ages! Follow the instructions below to build Tetromino Tussle on your own computer.

## Installing The Game

### 1. Clone the repository.

To clone this repository, simply enter the following in your terminal:

```
git clone https://github.com/clnmcdowell/TetrisVs.git
```

### 2. Install Unity Hub

If you already have the Unity Hub and Unity Editor installed, you can skip this step. To download Unity, go to this link and download the latest version for your operating system: <https://unity.com/download>. Make sure you have Unity Editor version 2021.3.15f1 installed for this game.

### 3. Build and Run Tetromino Tussle

Once you have installed the Unity Hub and Editor, select File in the top left corner of the Editor, and then select “Build and Run”. This should take a few moments, and then you will see the Title Screen. Enjoy your game! If you have any trouble with the Unity Editor, check out the documentation here: <https://docs.unity.com/>.

## Playing Tetromino Tussle

### 1. Start the game

## 2. Begin building your boards

### PLAYER 1 Controls:
